

Snap HP Coping: High-Performance Concealed Fastener Solution

MetalWyze Snap HP Coping is a high-performance, concealed fastener coping system with a dual continuous cleat design. Front and back cleats, manufactured from 22ga G-90 galvanized steel, allow for easy adjustment across varying parapet widths while maintaining consistent face and rear dimensions.

This standardized approach reduces production variables and improves lead times. The design minimizes material waste by eliminating the need to cover wide parapets, helping control costs. Customizable lengths reduce seaming and waste while delivering a clean, professional finished appearance.

Cover Material	Cleat Material	Dimensions	ES-1 Certified Pressure
.040" Aluminum	22ga G-90	Face Size: up to 5.5" Parapet Size: up to 13"	-220 PSF
24ga Galvalume	22ga G-90	Face Size: up to 5.5" Parapet Size: up to 13"	-220 PSF

Benefits & Quality Assurance

- Innovative Design
- Continuous Cleat
- Multiple Material & Finish Options
- Quick Ship Status
- Customizable Sizes
